

# Equipment & Materials

In order to maintain our current high standards we ask that parents contribute £40 towards the costs associated with start up equipment for practical subjects and certain materials needed for projects in Key Stage 3. This includes the following items, all of which are crucial to your child's education and well being during their time here.

## Science, Design & Technology and Art Aprons & Goggles

Wearing an apron and goggles is an essential Health and Safety element of most Science and Design & Technology lessons. To remove the stress and worry of losing or forgetting safety equipment, Tring School will ensure that an apron and goggles are provided, where appropriate, for all Art, Food Technology, Resistant Materials and Science lessons.

## Design & Technology Coursework

In Year 7 to 9 Design & Technology will offer the opportunity for your child to make a number of practical projects using a range of new materials. This will provide exciting challenges they will not have experienced previously and they will be able to bring home the finished items to you.
