Dear Parent /Carer

Year 9/10 - Science and Maths Study Support

As you are aware your child is part of the Science and Maths Study Support group who will be following a specially written course, supporting them as they work towards their GCSEs.

For Science the aim is to reinforce and revise the curriculum covered in normal lessons (AQA Synergy) using a practical and investigative approach with differentiated materials.

In order to help pupils improve their Maths levels we have signed the group up to a new online tutoring programme called MathsWhizz. The software makes a baseline assessment for each child and then tailors the online exercises to suit their individual needs. The ultimate aim is to help the pupils fill any gaps and make the expected level of progress over the next academic year. Again this is not a replacement of normal lessons but an additional learning resource to be used in the study support classes.

I will be supervising the use of MathsWhizz each week for 1 lesson however the students are free to do extra progressions at home in their own time if they wish. This is an ideal activity for students during this period of homeschooling when they may find themselves at a loose end. They have been given the login details/password and will complete the tuition on their chromebooks.

I will be keeping an eye on the amount of work completed and awarding achievements points accordingly.

Please find attached some literature provided by MathsWhizz. Should you have any further questions please do not hesitate to get in touch.

Thank you for your ongoing support.

Yours sincerely

Mrs N Everitt
Study Support Teacher
